

## Engineered Solutions. Trusted Results.

REACH: 0.297"

### 32442

**Reinforced Stiffener:** Reduces shrinkage by 50+% over the life of the product decreasing air and water infiltration.

**Softer Foam and Skin:** Newly developed foam and thinner skin technology provides decreased compression, improving operating and locking forces in windows and doors.

This product features our Pro-Slip II coating which provides excellent durability and co-efficient of friction properties making it a great choice for sliding applications.

And for those who extrude profile lineals, the Redesigned Stiffener allows for more consistent inline insertion; intended to reduce installation labor, scrap, and costs during manufacturing.

### Product Highlights

- Overall Height: .405" (10.29mm)
- Bulb Diameter: .297" (7.54mm)
- Pocket Depth: .100" (2.54mm)
- Pocket Width: .210" (5.33mm)
