

# Around The Corner (ATC) Seal

Unique new “around the corner” seal provides better protection from air and water infiltration when installed on casement windows. This cornering method eliminates the need for miter cuts – saving you time, providing easier installation, improving reliability, and increasing thermal performance.

## FEATURES & BENEFITS

- Single piece installation eliminates miter cuts, increasing thermal efficiency
- Low shrink kerf option provides less shrinkage over the life of the product
- Standard bulb sizes of .300 and .350 or custom sized from .200-.400 to meet specific needs
