

Jamb Limiter

AT 0626-2020

The jamb limiter device mounts to the jamb (opening side) of a casement window in the hinge cavity. Unlike other manufacture limiters that require repositioning with sash width changes or the use of different hinge types our Jamb Limiter provides a consistent 4" opening regardless of sash width or hinge type. It is designed to fit the standard hinge cavity for 14 series 2 bar hinges, making it compatible with most wood and vinyl window profiles.

Key Features & Benefits

- ✓ Compatible with all hinge types
- ✓ Provides a 4" opening that meets ASTM F2006 life safety requirements
- ✓ Tamper resistant
- ✓ Easily concealed in hinge cavity
- ✓ Stainless steel construction ensures long lasting functionality

Materials

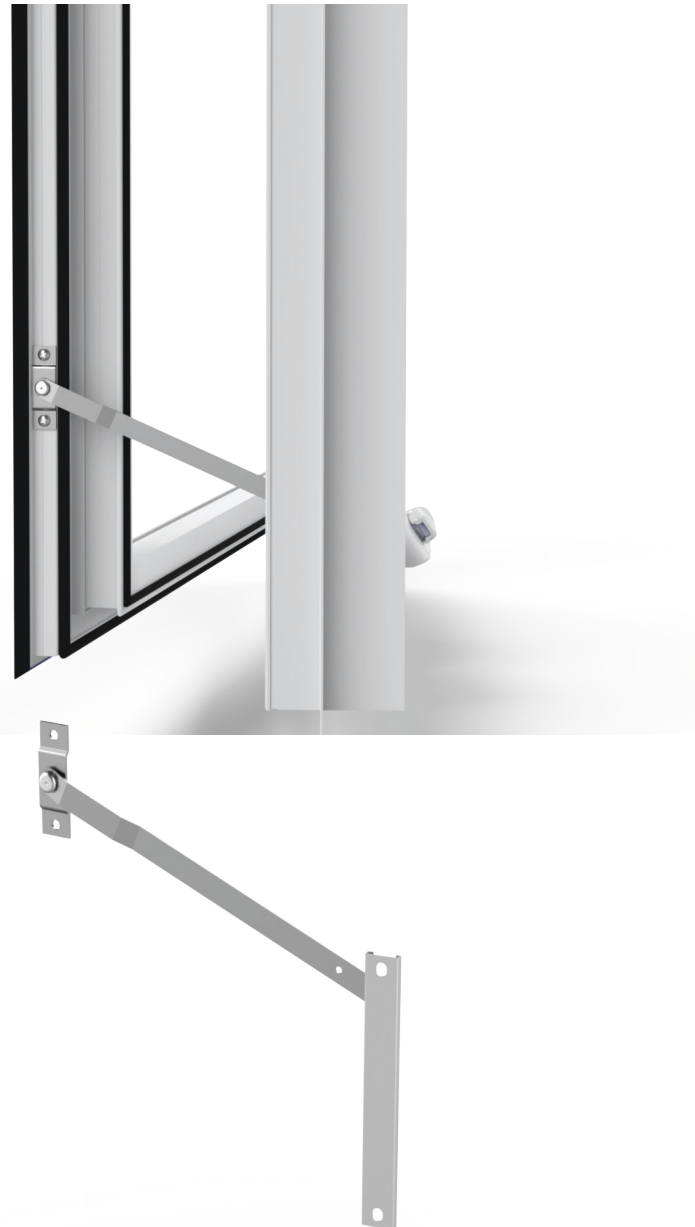

- ✓ Stainless steel

Warranty

- ✓ AT Standard 10 Year

Recommended Mounting Screws

- ✓ Pan Head Machine Screws ¼-20
*May be replaced with security screw
