The contemporary styled flush mount handle from AmesburyTruth is now available with electronic capability that allows locking and unlocking with the touch of a button. Bluetooth technology allows communication between the handle actuator and your phone or personal electronic device via online app. The MyPrecept website is designed to offer access to the web app and customer support information. The app features sharing of e-keys, the ability to check history, locked or unlocked status, and many other features. This product interfaces with AT’s standard Nexus 2 Point locks to provide reliable forced entry performance.
