Subject: **New!** Trickle Vent PN 15047

AmesburyTruth™ is pleased to announce our New Trickle Vent device.

Designed to provide fresh air ventilation for improved in home air quality, while the window remains closed and secure.

The Trickle vent is activated with a single finger and provides passive air exchange between inside and outside the home.

Our trickle vent supports both ADA operation requirements and HVI 901 ventilation standards in a single device.

It also meets AAMA 101 pressure ratings, resisting water infiltration for 25 minutes at 580 Pa.

Since it utilizes a single point of actuation it can be used in both vertical and horizontal applications and still meet ADA and AAMA height requirements.

Available Finishes:

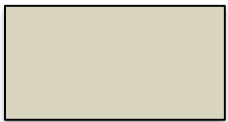

White

Black

Aluminum

Beige

Other finishes available upon request

Part Number is 15047.XX (XX is color)

It can be used on PVC, Wood, Steel and Aluminum window profiles. Utilizing both tape and screw mounting allows easy application to thin wall profiles.

Covered by our standard limited life-time warranty.

Trickle vent devices are available to order today. Contact your AT sales representative for pricing and lead time information.
