1. Will this work on my profile?
This will work on most standard wood, vinyl, and fiberglass profiles.

2. Is this a drop in for the Encore operator cutout?
No, it is the same cut out size, but it is not in the same location as the current Encore operator.

3. How does the product mount to the profile?
The lever operator mounting holes are the same as the Encore operator and uses the same screws.

4. Is this operator sealed to resist air and water?
No, this product is not a sealed unit.

5. Is this product ADA compatible?
No, this product takes (2) hands to operate the operator, and the handle is not applicable for grasping with limited mobility.

6. What are my cover and handle options?
At this time, we only have the (1) option.

7. Egress and Washability?
This product is not designed for egress or washability as the sash attachment must be disconnected to open the sash fully. Once disconnected the operator does not support the sash from opening or closing if it is moved by wind or other circumstances.

8. Is this product AAMA certified?
Currently there is not an AAMA test standard for this type of operator (AAMA 901).
