WEEPS

970300

Keep your window system performing at their best with high-quality window weeps, designed to manage moisture and protect against water intrusion in sliding and hung windows. These small but essential components allow water to drain efficiently from the window frame, helping to prevent long-term damage and preserve the integrity of your window system.

product highlights

- Promotes proper water drainage from window tracks and sills to help avoid leaks, rot, and mold buildup.
- Designed to fit a wide range of sliding and vertically hung window frames.
- Constructed from UV-stable composite for long-lasting performance in all weather conditions.
- Low-profile design blends seamlessly with most window frame finishes for a clean, finished look.
- Hinged flap design creates a built-in insect guard.
