WEEPS

980302

Protect your windows and home from water damage with reliable window weeps, specially designed for use in both sliding and hung window systems. These essential components drain water out of window helping to prevent moisture buildup, frame deterioration, and interior leaks.

product highlights

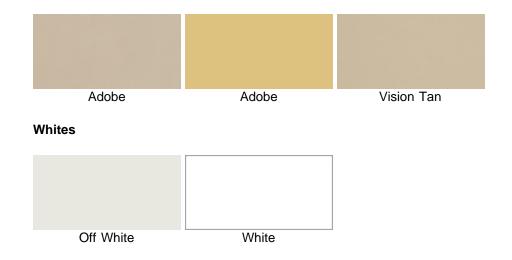

- Directs water away from the window frame and sill to reduce the risk of internal water damage and mold.
- Designed to fit most standard sliding and hung window systems.
- Made from high-quality, weather-resistant composite for long-lasting performance in all climates.
- Discreet appearance that maintains the clean aesthetic of your window frame without compromising function.
- · Hinged flap design creates a built-in insect guard.
