ACCESSORIES

Sash Lifter

The Sash Lifter solves sash sag problems better than traditional sill mounted sash ramps. The unique dual ramp system helps lift the sash into place with minimal effort applied to the operator, allowing for smoother operation and extended service life.

product highlights

- Adjustability (+/- .250)
- Reduces “sash hop” from traditional sill mounted ramps
- Low operating force
- Non-handed design
- Manufactured from weather resistant material
- Designed for all windows with 7/16” cavity
- Easily applied in the factory or field
- Available finishes: base and sash ramp neutral white, frame ramp clear
- Material: Plastic (Acetal, Polycarbonate)
- Ordering information: (1) sash ramp system per window (includes 2 ramps and 1 base in a bag)
- Screws are purchased separately
