ROLLERS - MID MARKET

Side Adjust 39 Series

Check out our 39 Series Side Adjust Tandem Rollers—the perfect solution for wood, vinyl, aluminum, fiberglass, and steel sliding doors. Built for versatility and easy installation, these rollers ensure your doors glide effortlessly while offering precise adjustments for a perfect fit.

Upgrade your sliding door system with the 39 Series Side Adjust Tandem Rollers—designed to provide a smooth, reliable sliding experience with easy adjustments and lasting durability. Perfect for all your sliding door needs!

Product Highlights

- Side adjust tandem rollers ideal for wood, vinyl, aluminum, fiberglass, and steel sliding doors
- End tabs for mounting that let you place the rollers away from the corner of the door panel (with standard, reverse, and mid-range mounting options)
- Customizable height with spacers for larger profile sizes
- Center adjustment point for easy roller height adjustment through access holes on the side of the panel
- Gear-driven cam style adjustment for quick and easy fine-tuning of roller height
- Body width of .692" with an adjustment range of .25" for a precise fit
- 1.25" diameter wheels available in steel, stainless steel, and composite materials (currently equipped with AT engineered bearings and precision bearings)
- Steel and 300 series stainless steel versions available for added durability
