Essential Duties & Responsibilities

- Provide strategic leadership for safety, environmental and health program development to achieve cultural permanence, and site-specific performance objectives and program implementation goals.
- Maintain understanding and knowledge of current federal, state, and/or company regulations and policies.
- Coordinate and conduct injury review process to determine and correct root cause.
- Lead and manage implementation of injury reduction efforts. Promote “Zero Injury Culture” initiatives.
- Track and report operational safety performance.
- Support the environmental functions of the business as warranted/assigned. o Maintain reporting requirements for environmental calendar. o Conduct training for environmental regulation issues as needed.
- Conduct safety training programs for all levels of operation.
- Provide leadership/facilitation and drive for sustained plant safety committees.
- Function as emergency coordinator and develop/drive emergency response/business continuity initiatives.
- Lead operation(s) to best practices and best-in-class safety and environmental results (including program development).
- Assist organization by participating in special taskforce assignments and special projects.
- Ensure compliance with all Federal, State and local Industrial Hygiene requirements.
- Perform other duties as assigned.

Knowledge / Skills / Abilities

- Proficient Collaborator; easily partners with, and gets things done with and through others.
- Flexibility to support off shifts as necessary.
- Ability to multi-task and balance priorities.
- Excellent people skills and professional demeanor; Ability to teach and communicate effectively at all levels of the organization.

- General industrial Safety, Risk Management, and Environmental experience desired.
- Good oral and written communication, and presentation skills.
- Must have analytical reasoning and problem solving capabilities.

Qualifications / Prior Experience

- BS in Industrial Safety or Hygiene; advanced degree and/or professional certification(s) preferred.
- 10+ years experience in safety, environment and health field in a manufacturing setting, at least three years in a manager role.
- Strong track record for transformative results through programs, training and culture shaping.
- Demonstrated Success in Leadership EHS position and passionate commitment to safety of others.
- Demonstrated Program and Practice Development, Implementation and Training success.
- Certified in CPR and First Aid.
